Applications of Bioprocess Processes in Environmental Protection and Purification

Message from the Guest Editors

- The use of plants and microorganisms for the reclamation of chemically degraded land;
- The remediation of air, grounds, water, sewage, and the revitalization of brownfield redevelopment;
- The impact of ions of heavy metals and other pollutants anthropogenic on chemical composition of plants and other materials;
- The use of municipal and industrial waste in different processes, for example, biological reclamation and the remediation of brownfield sites and landfills;
- Waste, recycling of organic waste and minerals;
- The use of microorganisms in the processes of purifying environmental components;
- The study of enzymatic activity in the environment;
- Toxicological tests on environmental protection and purification.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
