# Study on Bio-Thermofluid Dynamics

### Message from the Guest Editors

This Special Issue on bio-thermofluid dynamics aims to provide a platform to exchange novel advances in these studies and accelerate each study on biomaterials, biomimetics, bio-inspired engineering, and biology-related technologies. Topics include, but are not limited to:

- Freezing/thawing behavior of cells and tissues;
- Characterization of cell damage caused by high temperatures;
- Process design and device design for cryosurgery and hyperthermia;
- Design of thermosensitive polymer-based functional materials;
- Design of anti-freezing/anti-frosting surfaces;
- Drag reduction by using agar gel and polysaccharides; and
- Drag reduction in fish, dolphins, and whales.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
