# Advances in Biomaterials Design to Combat Implant-Associated Biofilms and Infections

### Message from the Guest Editors

With this Special Issue on “Advances in Biomaterials Design to Combat Implant-Associated Biofilms and Infections”, we intend to present a collection of various approaches to prevent implant-associated infections. Topics include, but are not limited to:

- Design of biomaterials that allow implant insertion through minimally invasive procedures;
- Use of antifouling materials;
- Stimuli-responsive antibacterial materials;
- Virulence factor-triggered adaptive antibacterial coatings;
- Incorporation of quorum sensing inhibitors.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
