Special Issue

CFD Applications in Energy Engineering Research and Simulation

Message from the Guest Editor

Computational fluid dynamics (CFD) has been firmly established as a fundamental discipline to advancing research on energy engineering. The major progresses achieved during the last two decades both on software modeling capabilities and hardware computing power have resulted in a considerable and wide spread of CFD interest among scientist and engineers. Numerical modeling and simulation developments are increasingly contributing to the current state of the art in many energy engineering aspects, such as power generation, combustion, wind energy, concentrated solar power, hydro power, gas and steam turbines, fuel cells, and many others. This Special Issue on "CFD Applications in Energy Engineering Research and Simulation" aims at providing the latest significant advances in the applications of computational fluid dynamics in energy engineering. Topics include but are not limited to:

- CFD fundamentals;
- CFD applications in power generation;
- CFD applications in renewable energies; and
- CFD applications in combustion, heat transfer, and rotating machinery.

Guest Editor

Dr. Alfredo Iranzo Energy Engineering Department, School of Engineering, University of Sevilla, 41092 Sevilla, Spain

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
