

Special Issue

Sustainable Development of Energy and Environment

Message from the Guest Editor

This Special Issue on the "Sustainable Development of Energy and Environment in Buildings" will focus on exploring innovative technologies and practices aimed at enhancing energy efficiency and environmental sustainability in the built environment. Key topics include the decarbonization of the building stock, circular economy in the built environment, the integration of renewable energy sources, advancements in building materials and design, smart building technologies, and policies promoting green building practices. Publications can include case studies, research findings, and theoretical developments that contribute to reducing the environmental impact of buildings while improving their energy performance and sustainability.
