

## Special Issue

# Advanced Biodegradation Technologies for Environmental Pollutants

### Message from the Guest Editor

This Special Issue aims to report recent advances in the development of biodegradation technology for environmental pollutants. The topics include, but are not limited to the following:

- bioremediation
- biodegradation
- biosorption
- xenobiotic compounds
- heavy metals
- enhanced microbiological treatment using genetic engineering
- genomic, metagenomic, proteomic, and bioinformatic analyses
- phytoremediation
- bacterial community analysis
- nanomaterial-assisted biodegradation

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
