# Advances in CO<sub>2</sub> Capture and Conversion

### Message from the Guest Editors

This Special Issue on “Advances in CO<sub>2</sub> Capture and Conversion” aims to cover recent advances in the development and application of CO<sub>2</sub> capture and conversion processes from a chemical reaction engineering point of view, and also address the main challenges that need to be overcome in order to bring this technology to the market. Potential topics include, but are not limited to:

- techno-economic analysis of CCUS processes and roadmaps for commercialization;
- experimental demonstration of novel catalytic reactors for chemical production;
- novel capture processes, including DAC;
- modeling of capture and conversion processes; and
- CO<sub>2</sub> reaction mechanisms.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
