

## Special Issue

# Carbon-Based Materials for Biosensing Technology

### Message from the Guest Editor

Carbon materials, such as graphite, graphene, graphene oxide, carbon nanotubes and fullerenes, have very unique structure, optical, thermal, electrical, optical, and mechanical properties. These properties are promising for fabricating state-of-the-art nanoscale sensors. The process of obtaining and accentuating carbon properties for sensing of each substance is paramount. The field is growing and many questions remain to be answered. This Special Issue on “Carbon-Based Materials for Biosensing Technology” aims to curate novel advances in processes of turning carbon materials into state of the state-of-the-art sensors to address longstanding challenges in biological sensors. Topics of carbon-based sensors include but are not limited to:

- Wearable stretchable;
- Electrical or doping;
- Electrochemical;
- Invasive electrophysiological;
- Olfactory;
- Nanopore;
- Processing or testing;
- Safety and biocompatibility;
- Reliability and robustness.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
