Mechanism of Cancer Cell Metastasis and Drug Development for Cancer

Message from the Guest Editors

This Special Issue on “Mechanism of Cancer Cells Metastasis and Drug Development for Cancer” aims to explore applications of cellular and molecular regulation to address cancer cell signaling, progression, metastasis, drug resistance, and therapeutic treatment. Topics include but are not limited to:

- The exploration of new cancer cell and microenvironment regulations;
- The exploration of new signaling pathways in cancer metastasis;
- The study of biomarkers, for cancer therapeutic strategies or prediction;
- The development of cancer models to guide personalized medicine.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
