

## Special Issue

# Selected Papers from the 14th Mediterranean Congress of Chemical Engineering

### Message from the Guest Editors

The Mediterranean Congress of Chemical Engineering (MeCCE) is a triennial event that has been taking place in Barcelona since 1978 in the framework of the trade fair EXPOQUIMIA. The event gathers at the premises of Fira de Barcelona chemical engineers from the academy and the industry visiting the industrial exhibition, presenting and sharing new ideas, and networking.

This Special Issue is coordinated with the 14th MeCCE Scientific Committee, and it includes selected papers from this conference. This Special Issue focuses on, but is not limited to, papers that align with the topics of the conference:

Advances and results in **chemical engineering science**:

- Chemical reactors and separation technologies;
- Processes intensification and process systems engineering;

their applications in:

- sustainable development and environmental engineering;
- food, biochemical and biomedical engineering;
- process and product engineering;

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
