Conceptual Design and Energy Analysis in Cycle Gasification Systems and Waste-to-Energy Technologies

Message from the Guest Editor

This Special Issue on “Conceptual Design and Energy Analysis in Cycle Gasification Systems and Waste-to-Energy Technologies” aims to publish novel advances on waste-to-energy technologies with special emphasis on gasification systems from the experimental and computational perspectives. Topics include, but are not limited to:

- Progress in waste gasification processes;
- Studies of advanced gasification reactors, computational models, and technologies for power generation;
- Cost and performance analysis of waste-to-energy technologies; and
- Life cycle analysis of waste-to-energy technologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
