

Special Issue

Fault Detection and Process Diagnostics by Using Big Data Analytics in Industrial Applications

Message from the Guest Editors

This Special Issue on “Fault Detection and Process Diagnostics by Using Big Data Analytics in Industrial Applications” aims to curate novel advances in the development and application of big data analytics to address long-standing challenges in fault detection and process diagnostics in state-of-the-art industrial processes. Related topics include but are not limited to:

- Machine learning techniques for fault detection and process diagnostics;
- Deep learning techniques for fault detection and process diagnostics;
- Fault detection and process diagnostics using image processing techniques;
- Advanced process monitoring and control schemes developed within the framework of big data analytics;
- Strategy planning and deployment of fault detection and process diagnostics;
- Intelligent alarm system and fault analysis;
- Fault detection and process diagnostics using dimension reduction and data visualization.

Guest Editors

Prof. Dr. Shu-Kai S. Fan

Dr. Chia-Yu Hsu

Dr. You-Jin Park

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
