

Special Issue

Techniques for Detection and Separation of Drugs, Metabolites and Toxicants

Message from the Guest Editor

Analytical toxicology is a multidisciplinary area that involves biotechnology, pharmacology, and analytical and clinical chemistry, which aid the observation, identification, separation, and measurement of toxicants (xenobiotics) in biological fluids and other specimens to find. This Special Issue on “Techniques for the Detection and Separation of Drugs, Metabolites, and Toxicants” seeks high-quality research articles focusing on the latest novel advances in analytical toxicology for both sample preparation and instrumental techniques.

Topics include but are not limited to:

- Advances in sample preparation techniques;
- Chromatographic and electrophoretic techniques;
- Mass spectrometry;
- Hyphenated techniques.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
