Drying Kinetics and Quality Control in Food Processing

Message from the Guest Editors

This Special Issue on 'Drying Kinetics and Quality Control in Food Processing' aims to integrate the novel advances in the development and application of mathematical modeling of drying operations and kinetic changes of food quality during drying. Topics include but are not limited to the following:

- Integrated (or multidisciplinary) studies on quality changes of food or bioresource product during dryings;
- Novel technologies to control food quality during drying;
- Optimization of quality parameters involved in drying operations;
- Fundamental and applied aspect of drying and dryers;
- Transport phenomena in food- or bio-porous media;
- Design, scale-up, and control of dryers in food or bioproduct processing.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
