Special Issue

Advances in Wastewater and Solid Waste Treatment Processes

Message from the Guest Editors

The main objective of the contributions for this Special Issue of *Processes* is to provide a view of the state of the art and the future prospects of Green Synthesis (Processing), with special emphasis on environmentally friendly, biocompatible nanoadsorbents and using natural renewable products or resources in order to support their valorization in environmental protection and sustainable development.

- bioinspiration and biomimetics
- sustainable life
- reuse and recycling of water and human goods
- green processing
- nanomaterials
- circular economy

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
