

Special Issue

Fabrication and Characterization of Advanced Composites for Structural Applications

Message from the Guest Editors

In modern technology, the continuous growth and evolution of composite materials have led to diversity in such materials. In order to enhance structural performance, holistic exploration of novel materials and optimization of the existing materials are essential. Original research articles based on experimental investigation and/or finite element modeling related to any kind of polymer composite materials, including synthetic, natural and hybrid fiber-reinforced composites, are invited to submit.

- Composite materials;
- Hybrid composites containing natural fibres and synthetic fibres;
- Fabrication (filament winding, pultrusion, VARTM and additive manufacturing);
- Life cycle assessment;
- Composite recycling;
- Weathering;
- Flammability;
- Mechanical characterization;
- Damage mechanics;
- Microstructural properties;
- Tribological properties;
- Crashworthiness;
- Ballistic impact;
- Fracture toughness;
- Non-destructive evaluation.

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
