

Special Issue

Advances in Adsorption of Wastewater Pollutants

Message from the Guest Editors

With the rapid progress of human life, innumerable pollutants are threatening aquatic systems, with water pollution becoming a critical health and environmental issue. Thus, innovative and affordable solutions that could be used to remove these pollutants are crucial. This Special Issue entitled “Advances in Adsorption of Wastewater Pollutants”, focusing on the development of innovative techniques that are adsorption-based for wastewater treatment. These novel solutions could comprise the utilization of unique materials for wastewater remediation, ecostructuring of a green approach via coupling to factorial designs, or any other relevant approach. The target pollutants include (but are not confined to) organics (pharmaceutically active compounds, personal care products, dyes, pesticides, etc.) and inorganics. All types of papers are welcome: research, review articles and communications.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
