Special Issue

Biofuels Production Processes

Message from the Guest Editor

The Special Issue, entitled "Biofuels Production" Processes", explores innovative, sustainable, and scalable approaches to the production of biofuels, with a strong emphasis on Environmental, Social, and Governance (ESG) considerations. As the world transitions toward a low-carbon future, biofuels represent a critical solution in reducing dependence on fossil fuels and lowering greenhouse gas emissions. This Special Issue invites high-quality research, reviews, and case studies that advance the science and engineering of biofuel production-including biochemical, thermochemical, and hybrid conversion technologies—as well as process optimization. feedstock sustainability, and life cycle assessments. Contributions that explicitly address the ESG dimensions of biofuel development-such as environmental impact assessments, social acceptance, responsible sourcing, and regulatory frameworks—are particularly encouraged. We aim to foster a multidisciplinary dialogue that connects technological innovation with ethical and sustainable practices. ultimately supporting a more resilient and inclusive energy future.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
