

Special Issue

Sustainable and Intelligent Wearable Technologies: Design, Processes, and Applications

Message from the Guest Editors

Wearable technology is one of the fastest growing fields, perfectly aligning with emerging trends in artificial intelligence, the metaverse, the Internet of Things, assistive robotics, healthcare monitoring, advanced materials, and smart fashion and textiles. Although considerable progress has been made in this area, there are still major challenges in achieving more multifunctionality, intelligence, comfort, safety, and sustainability. Topics include, but are not limited to, the following:

- Design and synthesis of novel polymers for fibers;
- Multifunctional fibers and composites;
- Nanotechnologies and nanofibers;
- Sustainable and eco-friendly fibers;
- Green and advanced manufacturing of fiber and textiles;
- Recycling and utilization of textile waste;
- Fibers for environmental, energy, and healthcare applications;
- Fiber-based sensors, actuators, and displays;
- Design, fabrication, and application of smart textiles;
- Intelligent wearable system integration;
- Artificial intelligence applications in fashion and textiles.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
