# Special Issue

# Design and Mechanism of Wastewater Treatment Systems

## Message from the Guest Editors

This Special Issue on "Design and mechanism of wastewater degradation systems" aims to present new advances in the development and application of wastewater treatment technologies to address the long-standing challenges of water pollution. Topics include, but are not limited to:

- Design of inorganic catalytic materials with high activity, reaction mechanism, and toxicity assessment;
- New development direction of sewage treatment;
- Development of models or simulations for building water treatment process systems;
- Simulation techniques, software, algorithms or other modeling and simulation tools.

Thanks and I hope you consider participating in this Special Issue.

## **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
