

Special Issue

Research on Polymer Processing Technology

Message from the Guest Editors

With the steady improvement of people's living quality and level, the pace of industrialization development is constantly advancing; therefore, the social development of process technology has put forward more stringent standards and requirements. Polymer materials cannot only be widely used, but can also realize the steady improvement of work efficiency. Polymer material refers to a polymer composition and polymer material, is a relatively high-molecular-weight compound construction of new materials, the structure of the material itself has significant modification, whether it is malleable or plasticity is relatively strong, so the material can be processed and adjusted more reasonably. This Special Issue on "Recovery and Utilization of Polymeric Materials" aims to cover recent advances in the development and application of processing and recycling of polymer materials.

Guest Editors

Prof. Dr. Xingyuan Huang

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
