Special Issue

Computational and Experimental Study of Granulation in Fluidized Beds

Message from the Guest Editors

This Special Issue on “Computational and Experimental Study of Granulation in Fluidized Beds” aims to gain a deeper insight into the effect of different process parameters on the micro and transport processes in fluidized beds and the resulting granule properties structures, which is invaluable for the production of tailor-made particles. For this, knowledge on novel experimental and simulation methods is required. Suitable topics include but are not limited to:

- Characterization methods for granule properties;
- Characterization methods for fluid and particle dynamics in wet gas-solid fluidized beds;
- Population balance modeling;
- Flowsheet simulation;
- CFD/DEM simulations;
- Heat and mass transfer in spray fluidized beds;
- Influence of drying on granulation;
- Adhesive forces and binding mechanism during granulation;
- Modeling and scale-up of fluidized bed spray granulation.

Guest Editors

Prof. Dr. Stefan Heinrich
Institute of Solids Process Engineering and Particle Technology, Hamburg University of Technology, 21073 Hamburg, Germany

Prof. Dr. Evangelos Tsotsas
Thermal Process Engineering, Otto-von-Guericke University Magdeburg, Universitaetsplatz 2, 39106 Magdeburg, Germany

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
