

## Special Issue

# Advanced Studies of Oil and Gas Flow in Unconventional Oil and Gas Reservoir

### Message from the Guest Editors

Hydrocarbons have been explored and produced for many decades, with a particular focus on conventional reservoirs. Increased energy demands coupled with a decline in new conventional resources necessitate the exploration of non-conventional reservoirs such as shale, tight gas sands, coalbed methane, gas hydrates, and tar sands. Because the fluids in these reservoir rocks are bounded by strong capillary forces, with a reduced pathway available for flow, a new set of challenges ranging from characterization to production must be addressed. In recent years, significant technological advances have been witnessed in this field, but further research is still needed. This Special Issue, entitled “Advanced Studies of Oil and Gas Flow in Unconventional Oil and Gas Reservoir”, aims to collect high-quality articles that present new findings, enhance our understanding of the field, and propose novel technologies related to all aspects of unconventional reservoirs

### Guest Editors

Dr. Adebayo Abdulrauf

Dr. Liwu Jiang

Dr. Ahmed Al-Yaseri

### Deadline for manuscript submissions

25 April 2026

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
