State-of-the-Art of Gene Regulation for Cancer Cell

Message from the Guest Editors

This Special Issue on “Application of Gene Expression in Cancer Cells Therapy” aims to present novel developments and inventions of gene expression technology with the values of basic research and clinical applications for cancer therapy. Topics include, but are not limited to, the following:

- Genomic editing technology for expression of cancer targeting genes
- Biocompatible vehicles for cancer specific delivery of genes
- Advanced techniques for expression of coding RNA and non-coding RNA
- Bioinformatics-based design of technology for expression of genes in cancers and therapeutic implications

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
