

Special Issue

Green Processes for Sustainable Fuel Production

Message from the Guest Editors

The implementation of environmental sustainability and circular economy needs to foster the development of low-carbon alternatives to traditional processes based on fossil fuels, this Special Issue aims at providing a multi-disciplinary, comprehensive, and insightful analysis of the issues needing to be addressed in the development of the processes and technologies of sustainable fuels, reporting research advances and considering the relevant aspects of sustainability, economics, energy, and social impact. We welcome the submission of original research papers and critical review synthesis papers by researchers from all disciplines on relevant topics, including, but not limited to:

- Waste recycling and conversion for fuel production
- Industrial symbiosis for circular approach on fuel production
- Biomass feedstock and (bio)chemical conversion technologies for biofuel production
- Carbon-neutral processes for exploitation of natural hydrocarbon resources
- Innovative and sustainable chains for hydrogen production, storage and utilization

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
