

Special Issue

Development of Hydrogen Storage Materials and Hydrogen Production Processes

Message from the Guest Editors

Hydrogen is recognized as a green and clean energy carrier, and has received a great deal of attention. However, the realization of hydrogen energy economy faces three major problems: the cheap production of hydrogen in large quantities, efficient and safe storage and transportation, and the application of economies of scale. The development of hydrogen storage materials and hydrogen production processes has become a hot topic in the field of clean energy. The combination of hydrogen and hydrogen storage materials will be the best combination for the development and utilization of new energy (i.e., hydrogen energy) in the future. This Special Issue, titled “Development of Hydrogen Storage Materials and Hydrogen Production Processes”, aims to introduce the latest progress in topics related to hydrogen storage materials and hydrogen production processes. Topics include, but are not limited to, methods and/or application in the following areas:

- Hydrogen production processes;
- Hydrogen storage materials;
- Hydrogen utilization technologies;
- Distributed hydrogen energy systems;
- Advanced hydrogen production technologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
