

Special Issue

Welding and Additive Manufacturing Processes

Message from the Guest Editors

The Special Issue on "Welding and Additive Manufacturing Processes" aims to address recent advancements and applications in welding and additive manufacturing processes. Potential topics include but are not limited to the following:

- Innovative welding processes:
- Developments in traditional welding methods
- Advancements in hybrid welding techniques
- Additive manufacturing technologies:
- State-of-the-art additive manufacturing processes
- Process optimization and control in additive manufacturing
- Process modeling and simulation:
- Computational models for welding and additive manufacturing
- Predictive modeling for defect prevention and quality assurance
- Quality assurance and inspection:
- In situ monitoring and real-time quality control
- Post-process inspection techniques

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
