Special Issue

Biological and Biotechnological Applications of Natural Products: Development, Chemical Analysis, Structure Determination, Bioactivity

Message from the Guest Editor

Natural products have long been a cornerstone of drug discovery, food innovation, and agricultural advancement due to their immense chemical diversity and potent biological activities. From traditional medicine to cutting-edge biotechnology, natural products offer a valuable reservoir of bioactive molecules that can be harnessed for therapeutic. industrial, and environmental applications. To assess the biological, biotechnological, or therapeutic potential of natural compounds, it is necessary to understand their chemical composition, mechanism of action, biological activity, and potential health effects, among other factors. We invite original research articles and reviews focusing on the discovery, structural elucidation, and functional analysis of natural products from diverse sources: plants, fungi, bacteria, and more. Contributions highlighting innovative methods for bioactivity screening, molecular docking, biosynthetic pathway elucidation, and biotechnological applications are especially welcome. Through this collection, we seek to deepen our understanding of natural products and advance new strategies for their application in health, agriculture, and industry.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
