Clean and Efficient Technology in Energy and the Environment

Message from the Guest Editors

Today, the crises of energy shortages, environmental pollution, and climate change are the main challenges to human survival. Developing clean and efficient energy and environmental technologies is a crucial and hot research topic. This Special Issue welcomes related new ideas and papers. The recommended topics include, but are not limited to, the clean and efficient technologies of combustion, pyrolysis, gasification, hydrogen production, VOCs purification, and heavy metals treatment.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
