

Special Issue

Design, Inspection and Repair of Oil and Gas Pipelines

Message from the Guest Editor

This Special Issue on the “Design, Inspection and Repair of Oil and Gas Pipelines” will include novel research advances using either modeling or simulation as an important component of oil and gas pipeline analysis and present the development of new and better design strategies for oil and gas pipelines, pipeline inspection technologies, and repair models. The topics may include but are not limited to the following:

- General design process and approach for onshore and offshore pipelines;
- Internal and external nondestructive testing techniques and technologies;
- Development of models or simulations of pipeline leak detection systems;
- Simulation techniques, software, algorithms, or other tools for modeling and simulation;
- Design, inspection, repair, operation, and scheduling of maintenance strategies, diagnostics, prognostics, lifecycle analyses, or other pipeline integrity management and safety issues.

Thank you and I hope that you will consider participating in this Special Issue.

Guest Editor

Prof. Dr. Wei Liang

School of Safety and Ocean Engineering, China University of Petroleum (Beijing), Beijing 102249, China

Deadline for manuscript submissions

10 August 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
