

## Special Issue

# Detection and Evaluation Process of Toxic and Harmful Substances in Foods

### Message from the Guest Editors

Food safety, nutrition and food security are closely linked. Unsafe food containing harmful bacteria, viruses, parasites, natural toxin, process induced contaminants or chemicals creates a vicious cycle of disease and malnutrition, particularly affecting infants, young children, the elderly and the sick. The detection and evaluation of toxic or harmful substances in food is even more important. The special issue includes, but are not limited to:

- Hazard analysis;
- Hazard analysis critical control point (HACCP);
- Microbial food safety and antimicrobial systems;
- Mycotoxins, marine biotoxins, plant toxins;
- Trace elements;
- Environmental contaminants;
- Food process contaminants;
- Adulteration, authenticity and allergenicity of foods;
- Animal feed where residues and contaminants can give rise to food safety concerns;
- Good manufacturing practices;
- Rapid methods of analysis and detection, including sensor technology.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
