Special Issue

Hierarchical Porous Materials: Synthesis, Properties and Applications

Message from the Guest Editors

This Special Issue entitled "Hierarchical Porous Materials: Synthesis, Properties and Applications" aims to present novel advances in the development of various methods of incorporating hierarchical porous materials, the study of their properties, and their applications. Topics include, but are not limited to, the following:

- Processes and incorporation strategies for formation of incorporated hierarchical porous materials;
- Porous hybrid nanoparticles and hollow structures;
- Peculiarties of investigation methods for nanocomposites based on hierarchical porous materials;
- Novel trends in application of incorporated hierarchical porous materials.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
