

Special Issue

Preparation and Optimization of Carbon Nanomaterials and Composites for Biological and Chemical Applications

Message from the Guest Editor

Carbon nanomaterials and composites have emerged as pivotal elements in the realms of biological and chemical applications, revolutionizing industries ranging from healthcare to environmental science. The intricate design and optimization of these materials play a paramount role in their efficacy and functionality. We are inviting you to contribute articles, perspectives, and reviews to this Special Issue on the "Preparation and Optimization of Carbon Nanomaterials and Composites for Biological and Chemical Applications", which endeavors to delve into the innovative methods and strategies employed in the synthesis and enhancement of carbon-based materials. We aim to explore their diverse applications in biological and chemical contexts, bridging the gap between fundamental research and real-world applications.

Guest Editor

Dr. Lin Jia Yin

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
