

Special Issue

Adaptive Control: Design and Analysis

Message from the Guest Editors

The aim of this Special Issue is to explore recent technological developments in adaptive control (design methods and theoretical analysis), especially for nonlinear stochastic processes such as robotic systems, manufacturing systems, transportation systems, power systems, chemical systems, and more. Research areas may include (but are not limited to) the following:

- Model reference adaptive control;
- Self-tuning adaptive control;
- Multiple model adaptive control;
- Intelligent adaptive control;
- Robust adaptive control;
- Adaptive sliding-mode control

Guest Editors

Dr. Weicun Zhang
Prof. Dr. Hassan el Fadil
Prof. Dr. Quanmin Zhu

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
