

Special Issue

System Identification: Latest Advances and Prospects

Message from the Guest Editors

System identification is currently one of the most advanced and continuously developing engineering techniques that allow for mathematical modeling. Its application area is extremely wide – from physical processes investigations, through vehicle dynamics studies, and even analyses of celestial bodies. Even though it has been in use since 1795 (C.F. Gauss), due to the infinite possibilities of this approach numerous aspects are still widely investigated. This special issue is focused on the recent developments in system identification, and its application on a variety of objects and physical processes.

Guest Editors

Dr. Piotr Lichota

Division of Mechanics, Institute of Aeronautics and Applied Mechanics,
Faculty of Power and Aeronautical Engineering, Warsaw University of
Technology, 00-665 Warsaw, Poland

Dr. Trojnecki Maciej

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
