

Special Issue

New Technologies for the Processing and Assessment of the Quality of Food Products

Message from the Guest Editors

Nowadays, the properties of meat comprise one of the most important topics for food scientists. Although some traits of meat can be predicted using standard methodologies, among scientists and the meat industry, there is a growing interest in finding new solutions by which a number of traits can be predicted/analysed more efficiently. Therefore, in this Special Issue, we invite you to submit papers (both original research and review articles) regarding new or improved methods and technologies for analysing different aspects of meat quality, from technological, nutritional and sensory traits to different hygienic and toxicological aspects related to meat production. Manuscripts that discuss the influence of pre-mortem and ante-mortem factors on different meat quality traits are also welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
