Unconventional Energy, Clean Energy and Carbon Sequestration: Progress in Technology

Message from the Guest Editors

Until now, the ratio of unconventional and clean energies to the total global energy is still small. Few commercial projects have been built for large-scale carbon sequestration. Therefore, further research is required to investigate the intrinsic mechanism of clean and low-carbon energy development. This Special Issue, “Unconventional Energy, Clean Energy and Carbon Sequestration: Progress in Technology”, presents recent advancements in the unconventional and clean energy development and carbon sequestration. Topics include, but are not limited to, the following:

- Development of unconventional gas resources;
- Clean and renewable energy;
- Gas extraction and hazard prevention in coal mines;
- Advanced progress in reservoir stimulation techniques;
- Carbon capture, sequestration, and utilization.

We look forward to receiving your contributions to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
