

Special Issue

Environmentally Friendly Production of Energy from Natural Gas Hydrates, 2nd Edition

Message from the Guest Editors

This Special Issue on “Environmentally Friendly Production of Energy from Natural Gas Hydrates” seeks high-quality research focusing on environmentally friendly production strategies for natural gas hydrates.

Topics include, but are not limited to, the following: (1) The impact of hydrate development on the environment and ecology, including analysis of engineering geological issues, methane leakage, reservoir damage, and contamination by chemical reagents.

(2) The development of environmentally friendly chemicals for hydrate development, such as drilling fluid additives, fracturing fluid additives, and various inhibitors.

(3) The application of industrial waste (such as power plant flue gas and waste heat) or low-quality energy (such as geothermal energy) in the efficient development of hydrates.

(4) The economic and technical evaluation of various environmentally friendly production strategies for natural gas hydrates.

Guest Editors

Dr. Qingchao Li

Dr. Qiang Li

Dr. Yandong Yang

Deadline for manuscript submissions

31 December 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes*. *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
