

Special Issue

Chemical Analysis in Seawater and Aquatic Organism Pollution

Message from the Guest Editors

This Special Issue, titled “**Chemical Analysis in Seawater and Aquatic Organism Pollution**”, seeks high-quality works with novel scientific research using various methods, analytical techniques, and approaches for identifying, characterizing, and measuring toxic chemical contaminant levels in aqueous samples (marine, aquaculture species, seawater, etc.). Taking into account the fact that no risk assessment would be possible without analytical data regarding food contaminants, research papers based on the assessment of human health risk (applying various indices) are highly welcomed. Reviews will be also considered for publication. Topics to be covered include (but are not limited to) the following:

- Monitoring and predicting the toxicological effects of chemicals in the aquatic environment;
- Environmental risk assessment of effects in aquatic toxicology;
- Marine toxicology.

Guest Editors

Dr. Veselina Panayotova

Dr. Katya Peycheva

Dr. Albena Merdzhanova

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
