

Special Issue

Functional Nanofibrous Membrane for Environmental Remediation

Message from the Guest Editors

This Special Issue on “Functional Nanofibrous Membrane for Environmental Remediation” aims to gather outstanding research and comprehensive coverage of all aspects related to nanofibrous membranes for environmental application, covering a wide range of technologies to produce novel nanofibers, composite nanofibrous membranes with novel pore structures, and as interface or combined with other technologies. This Special Issue will bring together high-quality research articles on the different aspects of nanofibrous membranes, including the current status and remaining challenges. Topics include but not are limited to:

- Nanofibrous membranes for wastewater treatment;
- Nanofibrous membranes for gas purification;
- Nanofibrous membranes for environmental protection;
- Nanofibrous materials for resource recycling;
- Development of novel nanofibrous membrane;
- Theoretical and experimental investigation for nanofibrous membrane production process design;

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
