Application of Metal-Based Nanoparticles in Electrochemical Systems

Message from the Guest Editors

This Special Issue, "Application of Metal-Based Nanoparticles in Electrochemical Systems", seeks high-quality works focusing on novel advances in the synthesis, properties, and application of metal-based nanoparticles related to electrochemistry. Topics include, but are not limited to:

- Electrosynthesis, green synthesis, and characterization of metal nanoparticles;
- Surface functionalization of electrodes;
- Electrode/electrolyte interfaces;
- Redox properties of metal-based nanoparticles;
- Electrochemical performance of metal-based nanoparticles.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
