Methane Reforming Processes

Message from the Guest Editors

Methane reforming has recently received renewed attention, both academically and industrially. Biogas-biomethane plants (e.g., processing municipal or agricultural wastes and crops) are spreading in several countries. Cheap non-renewable natural gas is increasingly available, and this is relevant since the coupling of fossil fuels conversion with carbon capture technologies is an affordable method to switch towards a sustainable economy. This Special Issue on “Methane Reforming Processes” aims to curate advances in the abovementioned applications and similar, and to address longstanding challenges in reducing their greenhouse gas emissions and energy expenditure. Topics include, but are not limited to:

- New system design;
- Integration with innovative technologies;
- Energy optimization and revamping plants;
- Feasibility studies;
- Catalysts and sorption materials;
- Reviews

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
