

Special Issue

Recent Development of Mixing in Chemical Processes

Message from the Guest Editors

Science in chemical reactors has evolved significantly with CFD dissemination and advanced experimental techniques such as LDA, PIV, PLIF and ERT. These tools enable a better knowledge of classic equipment and potentiate introducing novel mixers, namely static meso- and micro-sized devices. This issue of *Processes* will disseminate recent advances in mixing science and technologies in chemical processes. Experimental and numerical works are welcome, contributing to advancing knowledge and technology on classical and novel mixing equipment and applications.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
