

Special Issue

Machine Tool Design, Intelligent Diagnosis and Application

Message from the Guest Editors

The Special Issue aims to showcase practical applications and case studies that demonstrate the successful implementation of intelligent technologies in the field of machine tools. Contributions focusing on industrial applications, productivity improvements, energy efficiency, and sustainability are particularly welcome. The ultimate goal of this Special Issue is to foster knowledge exchange and promote advancements in machine tool design, intelligent diagnosis, and their application. Topics include, but are not limited to:

- intelligent diagnosis algorithms;
- sensor integration;
- real-time monitoring;
- decision support systems
- intelligent machine tool systems;
- adaptive control strategies;
- smart manufacturing processes;
- optimization techniques.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
