

## Special Issue

# Advances of Nanocomposites in Bioremediation Processes

### Message from the Guest Editors

Nanocomposites are defined as hybrid multiphase materials that exhibit unique and tunable physical, chemical, and biochemical features, taking into account multiple factors such as local chemistry, mobility, morphology, or crystallinity. The varying application of nanocomposites in different research areas has proven challenging, and the increased interest regarding applications in environmental sciences has allowed for the movement towards bioremediation processes. Bioremediation provides different cleanup strategies in the biological restoration and rehabilitation of contaminated sites and for some types of wastes. Within this scenario, nanocomposites have emerged as being rapid, effective, and efficient in bioremediation, avoiding or limiting toxic effects on microorganisms together with improving microbial efficiency and activity. This Special Issue on “Advances of Nanocomposites in Bioremediation Processes” seeks high-quality works focusing on the latest advances in nanotechnology, nanosciences, and nanomaterials for bioremediation processes.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto  
Department of Drug Science and Technology, University of Turin, Via P.  
Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
