Application of Nanoparticles in Cancer Therapy

Message from the Guest Editors

This Special Issue on “Application of Nanoparticles in Cancer Therapy” seeks high-quality work focusing on the latest advances of nanotechnology applied in cancer therapy area. Topics include, but are not limited to:

- Development of new nanomaterials for cancer therapy;
- Development of nanocarriers for personalized and precision medicine;
- Design of lipid/polymer/hybrid nanocarriers targeting for cancer therapy;
- Design of new macromolecules and derivatives for cancer therapy;
- Investigations of alternative therapeutic strategies involving nanocarriers for cancer therapy;
- Investigations on the translational aspects and scale-up of nanocarriers for cancer therapy.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
