Special Issue

Network Pharmacology Modelling for Drug Discovery

Message from the Guest Editor

Recently there has been an increasing need to understand the polypharmacological effects of small molecules for treating complex diseases. Network pharmacology approaches aim at a systems-level modelling of mechanisms of action of drugs by integrating drug-target interaction, protein-protein interaction, and other types of interactome data. The modelling approaches have led to the prediction of drug responses for patients as well as the identification of new targets and new disease indications for existing drugs. In this research topic, we would like to discuss the recent advances in network modeling approaches and their applications in drug discovery for cancer and other complex diseases. Research papers and review articles focusing on computational tool development as well as experimental techniques are welcomed.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
