# Fluid Dynamics and Heat Transfer for Non-Newtonian Fluids

### Message from the Guest Editors

This Special Issue aims to collect the latest contributions in thermo-fluid dynamics for non-Newtonian fluids. Topics of interest for the Special Issue include (but are not limited to):

- Numerical analysis of non-Newtonian flows.
- Forced convection in non-Newtonian fluids.
- Heat transfer enhancement techniques for energy saving.
- Scalar transport by non-Newtonian fluids.
- Phase-change and multiphase flows.

Numerical, theoretical, and experimental studies are encouraged, and interdisciplinary approaches are also appreciated.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
