Physical and Chemical Removal of Recalcitrant Pollutants Using Novel Solids: Nanomaterials, Biochar, and Waste-Derived Biomaterials

### Message from the Guest Editors

This Special Issue will cover the sustainable physical and chemical removal of recalcitrant pollutants, including topics such as new and innovative nanomaterials, novel biochar, innovative uses of wastederived biomaterials, circular economy promotion, reduction in fossil-derived plastics and waste-derived biomaterials, simulation, modeling, and technoeconomic analyses.

# About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
