Drug Discovery and Delivery Processes

Message from the Guest Editor

Over the past many years, researchers have been working on developing methods to improve drug delivery processes, and nanotechnology stands out as one of the most adopted and successful techniques for that purpose. Improving drug solubility and bioavailability and minimizing non-specific drug toxicity are the main aims of nanotherapy. Considering the importance of the processes that are used to discover, develop, and/or deliver drugs, we aim to release this Special Issue entitled as “Drug Discovery and Delivery Processes”. This Special Issue will include but is not limited to areas related to drug discovery and development, delivery processes, drug targeting, nanotechnology, and drug repurposing. For the successful release of this Special Issue, we invite original research articles, reviews, clinical trial reports, short/mini articles and reviews, editorials, opinions, and/or conference notes covering the topics on drug discovery and delivery method developments.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
